PROFESSIONAL SUMMARY

A results-driven and curious final-year Computer Science and Design Engineering student with a strong grasp of full-stack development, object-oriented programming, and machine learning. Demonstrated ability to design and deploy web applications, integrate AI/ML models, and solve real-world problems through innovative solutions. Skilled in C, C++, Python, JavaScript, HTML/CSS, and MySQL, with practical experience in tools like Gradio, OpenCV, and TensorFlow. Eager to contribute to forward-thinking projects and enhance technical expertise through an impactful internship.

TECHINICAL SKILLS

1. **Programming Languages:** C, C++, Python
2. **Web Development:** HTML, CSS, JavaScript
3. **Database:** MySQL
4. **Tools/Frameworks:** Gradio, Machine Learning Algorithms
5. **Soft Skills:** Teamwork, Problem Solving, Adaptability

RELEVENT COURSEWORK

- Data Structures
- OOPS(C++)
- Python
- Cloud Computing

EDUCATION

1. Bachelor of Engineering in Computer Science and Design
   ATME College of Engineering | CGPA: 8.9 | Expected Graduation: Sept 2026
2. Pre-University (XII)
   K. Puttaswamy PU College | 84.66% | 2022
3. Sri Paramahamsa Vidyanikethana | U.K.G- SSLC | 81.44% in S.S.L.C | Graduated 2020

INTERNSHIP EXPERIENCE

Ediglobe | Intern | 2 Months

1. Successfully completed a major project on Car Price Prediction using AI and machine learning algorithms.
2. Gained hands-on experience in building web-based applications and integrating predictive models.

ACADEMIC PROJECTS

1. **AI-Based Traffic Management System**

    - Team Project | ATMECE | Jan 2024 – Present
    - Developed an AI system using LSTM (traffic prediction) and YOLOv5 (emergency vehicle detection), reducing simulated congestion by 30%.
    - Tools: Python, React, OpenCV, TensorFlow.

2. **Cloud-Based Resume Builder**
    - Team Project | ATMECE | Feb 2025 – Jun 2025
    - Where it creates the Resume and stores the resume at cloud platform.

3. **CAR Prize Prediction**

    - Developed a web-based application to predict car prices using AI and machine learning algorithms
    - Tech Stack: HTML, CSS, JavaScript (Frontend), Python (Backend)
    - Outcome: Delivered a seamless user experience by integrating predictive models with a responsive interface
    - Internship: Completed as part of a 2-month internship at Ediglobe.

4. **Interior Design Web Application**

    - Designed a web application for interior designers and architects using Python and Gradio interface
    - **Tech Stack:** Python (Backend), Gradio (Frontend), Machine Learning Algorithms
    - **Outcome:** Enhanced user experience by providing an intuitive platform for design visualization
    - **Team Collaboration:** Worked in a team to deliver the project successfully.

KEY ACHIEVEMENTS

1. Present Working on Major Project and Cloud Computing Project.
2. Successfully completed a major project during a 2-month internship at Ediglobe.
3. Consistently maintained a high academic performance (CGPA: 8.9).
4. Participated in **3 hackathon competition**, **2 idea pitch competitions**, and **1 PowerPoint presentation competition**.
5. Certifications uploaded on LinkedIn.(https://www.linkedin.com/in/jeevithgowda-r-m-33a022277/)
